

**STEPHENSON SURVEYING, INC.**

“Our focus was always on completing our projects on time and under budget. We would spend hours reviewing our estimates and time devoted to projects. Our staff would manually create reports for our weekly meeting. cvlTracker changed all of that! Now our reports are much more accurate and are generated instantly. cvlTracker sends us automatic budget and overdue project warnings. Our focus has now returned to the quality assurance of our projects. A hidden bonus of the cvlTracker system is that we have now improved our customer service 3 fold. We believe in the cvlTracker system and give it our full endorsement.”
